Baldy rigid 330 trimmed

***GP Designs sneaker fender series.**

Once again, George Pacheco takes the industry to the next level by introducing a new era in fender design. These 13 gauge steel fenders offer the ultimate in looks and strength. Constructed from a spun radius, two piece design. These fenders will eliminate the time consuming task of piecing stock fenders to accommodate wide tires. These fenders are shaped to perfection. Minimal body work is required.

Trimmed fenders come complete with reinforcement. Blank fenders require reinforcement after custom trimming has been completed.

Reinforcement on trimmed fenders, as shown.
